Same position. Change the condition.

A paired benchmark makes a hidden board convention an explicit test.

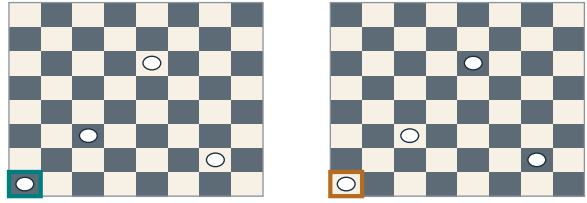
Fresh positions
Exact / symmetry filter
Recorded source pools

Renderer contract
FEN, camera and pixels
Corners + checksums

Factor panels

Elevation	4 levels
Geometry	8 levels
Palette	6 levels
Framing	2 levels

Paired conventions



a1 dark **a1 light**

Same pieces, squares, pose and framing.
Only the board light/dark assignment changes.

SPLIT BY POSITION, NOT BY IMAGE

500 groups shared across panels

400 dev groups **100 sealed groups**

20 cells × 2 conventions × 500 positions
20,000 cell-images; 18,000 unique image hashes

All views of a position stay together. No final-test scoring.

A separate adaptation pool
8,000 fresh groups, both conventions
Nested budgets: 500 / 2,000 / 8,000
Disjoint from evaluation positions

The unit of comparison is a matched position, not an unrelated picture.
